

BIOBASICS NSW

MAY 3 - 4 2024

15 CPD HRS

**SUITABLE FOR: PAST PARTICIPANTS,
STUDENT & PRACTICING OSTEOPATHS**

Have you ever felt tissues change under your neutral hands and wondered what happened? Do you want to save your hands and body from burnout? Do you want to know the difference between direct, indirect and explore a biodynamic approach to increase your skill set? Treat tissues you can't directly touch and conditions you haven't been able to before?

Then this is the course for you, to aid you further on your osteopathic journey. Learn in a hands-on experiential way, the clinical application of these teachings with a valuable one tutor to two participants ratio. If this sounds like your next step, come and join us.

Additional note: This course is overseen by Manuela and Robyn, it is the clinical application of the Biodynamic principles.

To the digger who will take time to dream and the dreamer who will wake up and dig, the science of osteopathy will unfold into a magnitude equal to that of the heavens.

Dr W.G. Sutherland
